THE MANY BENEFITS OF SECURITY SCREENS

Security screen doors and window screens are synonymous with providing protection from intrusion, but have you considered that compliant security screen products can be effectively used for purposes other than security.

Security screens provide many other benefits other than security.

Compliant security screens can enhance the value, liveability, privacy and comfort of your home, and may reduce your home insurance cost, whilst providing protection from external elements.

Peace of Mind & Comfort

Feeling safe, secure and comfortable is paramount in the minds of homeowners. Safety is essential to the health and well being of household occupants.

Protection from the Elements

Security screens offer UV and heat protection, cyclonic and flying debris protection, fire and hail protection.

Natural Light & Improved Ventilation

Security screens allow you to open up an indoor environment and let in natural light whilst allowing for improved ventilation.

Fire Attenuation

Security screens tested for fire attenuation provide a reduction of radiant heat transmission and helps to reduce the spread of flames between high density housing.

Privacy

The thickness and angle of the mesh makes it harder to see into your house, whilst providing an uninterrupted view from the inside.

Bushfire Safety

Screening systems that meet your local bushfire regulations, Australian Standard requirements, and the National Construction Code provide protection from radiant heat and flying embers, therefore protecting your home.

Energy Efficiency

Security screens help to improve the energy efficiency and quality of air in your indoor environment in warm and cold conditions.

Protection from Fall

Openable windows present a risk of a person, particularly a small child falling from height. A compliant security screen is deemed to comply with the National Construction Code for fall prevention, and removes the risk.

Emergency Escape

In an emergency, a keyless escape system allows for a quick escape, whilst still providing external security. Security bars, grilles and shutters may not allow this.

Cyclone Impact Protection

Cyclone tested systems protect your home from cyclone debris.

Security

Security is an investment in your home and family. We are a proud member of the National Security Screen Association and we can provide you with the right advice, security screen products and installation needs for your home security.

Meeting consumer demand for compliance.
